### Introduction

#### Overview

This document provides a photographic record of buildings in the Glover and Nathan's Estates Heritage Conservation Area, Mosman. This comprehensive record of the streetscape and built form can be used to benchmark and compare changes in the conservation area over time.

# Statement of Significance for the Glover and Nathan's Estates Heritage Conservation Area

The conservation area forms a precinct that is significant as a relatively in tact and representative example of the late 19<sup>th</sup> and early 20<sup>th</sup> century phase of development in the Mosman area. This phase of development was the major period of residential growth in the local area as larger estates were subdivided and sold to speculative developers. The area demonstrates a good diversity of building types and styles as development ranged from the Italianate Cottages of the early 1890s in Belmont Road, Federation period residential development demonstrating cohesive patterns of form, scale and materials, built in Glover Street from 1900 to 1905; and the Californian Bungalows of the 1920s in Cabramatta Road. The significance of the streetscape has been diminished slightly due the intrusive, yet reversible, introduction of high walls and the painting of original face brick. However, the study area has been considerably less affected by these intrusive elements than other areas of similar character and period in the Mosman area.

### **Explanatory note**

Each page of this document contains a boxed key which, for each photograph, identifies:

Road address

eg: 78 Cabramatta Road

The road address for an individual building is identified in addition to the corner road if applicable. Roads, laneways and passages are also shown.

Building title

eg: Melville

The building title is identified from building façade or signage

Heritage item Y/N

eq: Y

Items of heritage significance are identified in Schedule 5 of the Mosman Local Environmental Plan 2012

HCA Ranking

eg: 2

The HCA Ranking (based on a scale of 1 to 4) has been identified from the Glover Street and Belmont and Cabramatta Roads Conservation Area studies by City Plan Heritage undertaken in 2003 and 2004. A key to the conservation area ranking is provided below

### Other comments

eg: Semi detached dwelling / Photo 1 of 2

Other comments provide additional information of interest. For example, may state that the building is semi-detached or part of a series of photos taken to catch some detail otherwise not shown in one photograph

Date of photographie: 23 November 2013

The date the photograph was taken is indicated. The photographs were taken between January 2013 and May 2014 by Benjamin Gresham, Strategic Planner.

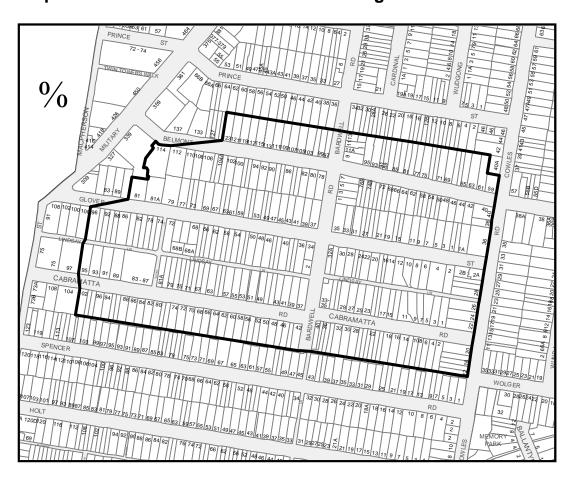

# **Extract from the Glover Street and Belmont and Cabramatta Roads Conservation Area studies**

The following is an extract from the Glover Street Heritage Assessment, page 30 (September 2003) and the Belmont and Cabramatta Roads Conservation Area Study, pages 38-40 (December 2004) by City Plan Heritage. It is a key to the conservation area rankings (based on a ranking scale of 1 to 4) for each building identified in this photographic survey.

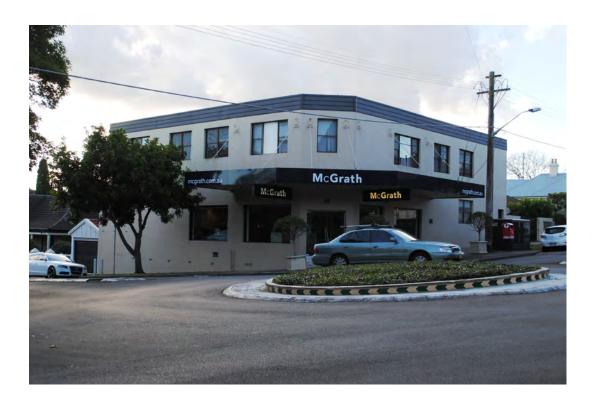

Ranking	Description	Objectives of development control
A	A building recommended for individual listing in the schedule	
В	A building which is already a heritage item	Maintain heritage characteristics and streetscape intactness
1 / Highly Intact	A building with a high degree of intactness and/or which contributes substantially to the stated character of the area in terms given in the definition of a Conservation Area	Must not be demolished and their contribution to the area is to be maintained or enhanced
2 / Contributory	A building which contributes substantially to the character of the area but significance has been reduced by loss of original materials or detail (eg roof, chimneys, fences), unsympathetic additions (eg verandah infill) or inappropriate decorative treatment (eg painting of face brickwork)	Must not be demolished and their contribution to the area is to be enhanced through the removal or reversal of intrusive elements
3 / Neutral	A building where the impact on the heritage character of the area is neutral	Only to be demolished if replaced by something that is to contribute to the significance of the area. New contemporary dwellings acceptable but must account for significance and character and contribute to the Conservation Area and must strive for a 1 ranking not a 3 or 4 ranking

Ranking	Description	Objectives of development control
4 / Adverse	A building which has an adverse impact upon the character of the area because of its scale, design, assertiveness, materials or the like, or because its original qualities have been mutilated or removed	Only to be demolished if replaced by something that is to contribute to the significance of the area. New contemporary dwellings acceptable but must account for significance and character and contribute to the Conservation Area and must strive for a 1 ranking not a 3 or 4 ranking
