

**Mosman Council  
Climate Action Community Consultative Committee Meeting**

**Harnett Room  
21 November 2023  
8.30 am – 10.10 am**

**Present**

<b>Chairperson:</b>	Mayor Carolyn Corrigan	Madam Mayor (MM)
<b>Deputy Chairperson:</b>	Councillor Randall	MR
	Jane Wilder	JW
	Rosie Adams	RA
	Steven Smith	SS

**This meeting was opened with the acknowledgement of country**

		<b>Action</b>
<b>1.</b>	<p><b>Welcome</b></p> <p>MM opened the meeting</p>	
<b>2.</b>	<p><b>Apologies</b></p> <p>Robert Grant, Sarah Rhodes, Craig Covich, Paloma Matis</p>	
<b>3.</b>	<p><b>Disclosures Non – Pecuniary Interest</b></p> <p>None to declare</p>	
<b>4.</b>	<p><b>Climate Action Resilience Strategy Update</b></p> <p>SS- Discussed recent amendments to plan and that it was adopted by Council on 14 November. It would have been good to run the amendments past the committee but unfortunately August’s meeting was cancelled. Committee members were happy with the plan amendments with RA noting that the addition of tables is a great idea. RA also stated that the plan is more important than the mitigation plan.</p> <p>There was broad discussion around the Intergovernmental Panel on Climate Change (IPCC) and the 5 different rcp scenarios. It was agreed to discuss these prior to the next update of the plan.</p> <p>SS - stated that Council is part of the Sydney Coastal Councils Group project which are looking at sea level rise, however it’s an ongoing topic as the State Government do not want to involve themselves or give funding. Council does not have the expertise to propose a figure for sea level rise so will continue to use the IPCC figures.</p> <p>SS - Mosman Council has engaged Manly Hydraulics Laboratory (MHL) to complete Councils flood study. It’s an important study for Council and is mandatory for Council to complete.</p>	<p>Paloma Matis to present to Committee rcp scenarios</p>

		<b>Action</b>
<b>5.</b>	<p><b>Mosman Council Environmental Research Micromex Research</b></p> <p>SS – Presented a high-level survey for various environment and climate related topics. General discussion was had, and MM acknowledged the significance of the survey and that it showed good leadership.</p> <p>SS – noted that it was for internal use however would distribute slides with minutes once all Councillors have received a copy of the complete survey.</p>	
<b>6.</b>	<p><b>Sustainability workshop update</b></p> <p>SS – Ran through list of projects completed since May 2023. List also included proposed workshops and projects up to February 2024.</p>	
<b>7.</b>	<p><b>General Business</b></p> <p>MM – The Bus Walk. Bus 114 to encourage bus use instead of car use to get to local beaches.</p> <p>MM - Nomination Form – 2024 Citizen of the Year and Young Citizen of the Year. Nominations are now online.</p>	
<b>8.</b>	<p><b>Next Years Meeting Schedule</b></p> <p>5 March 2024 4 June 2024 3 September 2024</p> <p>All meetings will start at 8.30 am.</p> <p><b>Meeting closed at 10:10 am</b></p>	

# Mosman Council

**Environmental Research**

Prepared by: Micromex Research  
Date: June 2023

# Methodology and Sample

## Sample selection and error

A total of 402 resident interviews were completed. Respondents were selected by means of a computer based random selection process using Australian marketing lists, Leading Lists, List Brokers and SamplePages.

A sample size of 402 residents provides a maximum sampling error of plus or minus 4.9% at 95% confidence. This means that if the survey was replicated with a new universe of N=402 residents, 19 times out of 20 we would expect to see the same results, i.e. +/- 4.9%.

For the survey under discussion the greatest margin of error is 4.9%. This means, for example, that an answer such as 'yes' (50%) to a question could vary from 45% to 55%.

## Interviewing

Interviewing was conducted in accordance with The Research Society Code of Professional Behaviour.

## Data analysis

The data within this report was analysed using Q Professional.

Within the report, ▲▼ and blue and red font colours are used to identify statistically significant differences between groups, i.e., gender, age, etc.

Significance difference testing is a statistical test performed to evaluate the difference between two measurements. To identify the statistically significant differences between the groups of means, 'One-Way Anova tests' and 'Independent Samples T-tests' were used. 'Z Tests' were also used to determine statistically significant differences between column percentages.

Note: All percentages are calculated to the nearest whole number and therefore the total may not exactly equal 100%.

## Ratings questions

The Unipolar Scale of 1 to 5 was used in all rating questions, where 1 was the lowest importance or satisfaction and 5 the highest importance or satisfaction.

This scale allowed us to identify different levels of importance and satisfaction across respondents.

**Top 2 (T2) Box:** refers to the aggregate percentage (%) score of the top two scores for importance. (i.e. important & very important)

**Top 3 (T3) Box:** refers to the aggregate percentage (%) score of the top three scores for satisfaction or support. (i.e. somewhat satisfied, satisfied & very satisfied)

We refer to T3 Box Satisfaction in order to express moderate to high levels of satisfaction in a non-discretionary category. We only report T2 Box Importance in order to provide differentiation and allow us to demonstrate the hierarchy of community priorities.

# Sample Profile

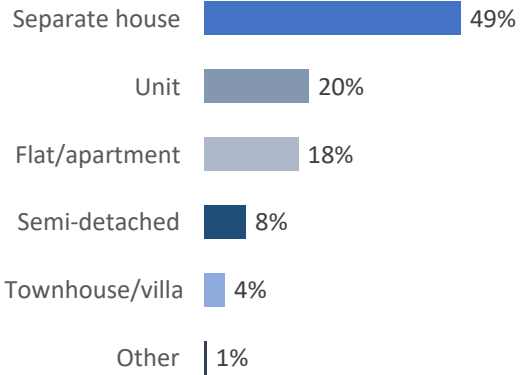

## Gender

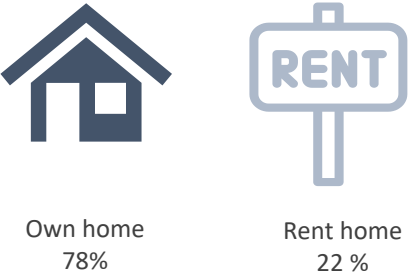

## Age

## Dwelling type

## Housing status

## Time lived in area

## Section 1:

# Perceptions and Experiences

This section explores resident attitudes, behaviours and concerns for sustainability measures such as preparedness to respond in an emergency, personal actions, concerns for climate change and reducing energy consumption.

## Section One

# Preparedness to Respond in an Emergency Situation

Overall, 89% of Mosman residents feel they are at least somewhat prepared to respond to a sudden emergency situation. Females are significantly less likely to state they feel at least somewhat prepared. Preparedness appears to increase with age, and those currently living in a rental feel marginally more prepared.

	Overall	Male	Female	18-34	35-49	50-64	65+	Own home	Rent
Top 3 Box %	89%	93%▲	86%	88%	84%	91%	93%	88%	93%
Mean rating	3.63	3.72	3.56	3.54	3.57	3.64	3.76	3.61	3.73
Base	401	179	222	86	102	104	109	311	89

Scale: 1 = not at all prepared, 5 = very prepared  
 ▲▼ = A significantly higher/lower level of preparedness (by group)

# Agreement with Connectedness

Agreement is high for connectedness measures, with 78% stating they agree/strongly agree that they can get help when needed and 71% feel apart of their neighbourhood/community (a significantly higher result than our Micromex Metro Benchmark). Those aged 18-34 are significantly less likely to agree/strongly agree that feel part of their neighbourhood/community.

Agree/ strongly agree	Overall	Male	Female	18-34	35-49	50-64	65+	Own home	Rent
Can get help	78%	79%	78%	73%	79%	76%	84%	78%	78%
Feel part of community	71%	69%	73%	55% ▼	78%	77%	71%	76% ▲	54%
Base	402	180	222	86	102	104	110	312	89

# Importance of Issues Facing Mosman Today

Residents believe transport and waste generation/recycling are the most important issues facing the Mosman area today, with 50% stating transport is 'very important'. Females were significantly more likely to rate all issues higher in importance (see next slide). On the next slide we have also provided comparisons to previous years, although this is only for a point of reference due to an 8 year gap in research and slight wording changes. However, climate change has seen the largest increase in importance from 2015, with a mean rating increasing from 3.57 to 3.80.

# Importance of Issues Facing Mosman Today

	Overall	Male	Female	18-34	35-49	50-64	65+	Own home	Rent
Transport (public and private)	4.12	3.95	4.26▲	4.03	4.12	4.11	4.21	4.16	4.03

Base	401	179	222	86	102	104	109	311	89

# Concern for Climate Change

Overall, 78% of Mosman residents are concerned about climate change.

Thinking about climate change, residents are most concerned about the impacts on quality of life, maintaining eco-systems and the impact on future generations.

Residents aged 65+ are significantly less concerned about climate change.

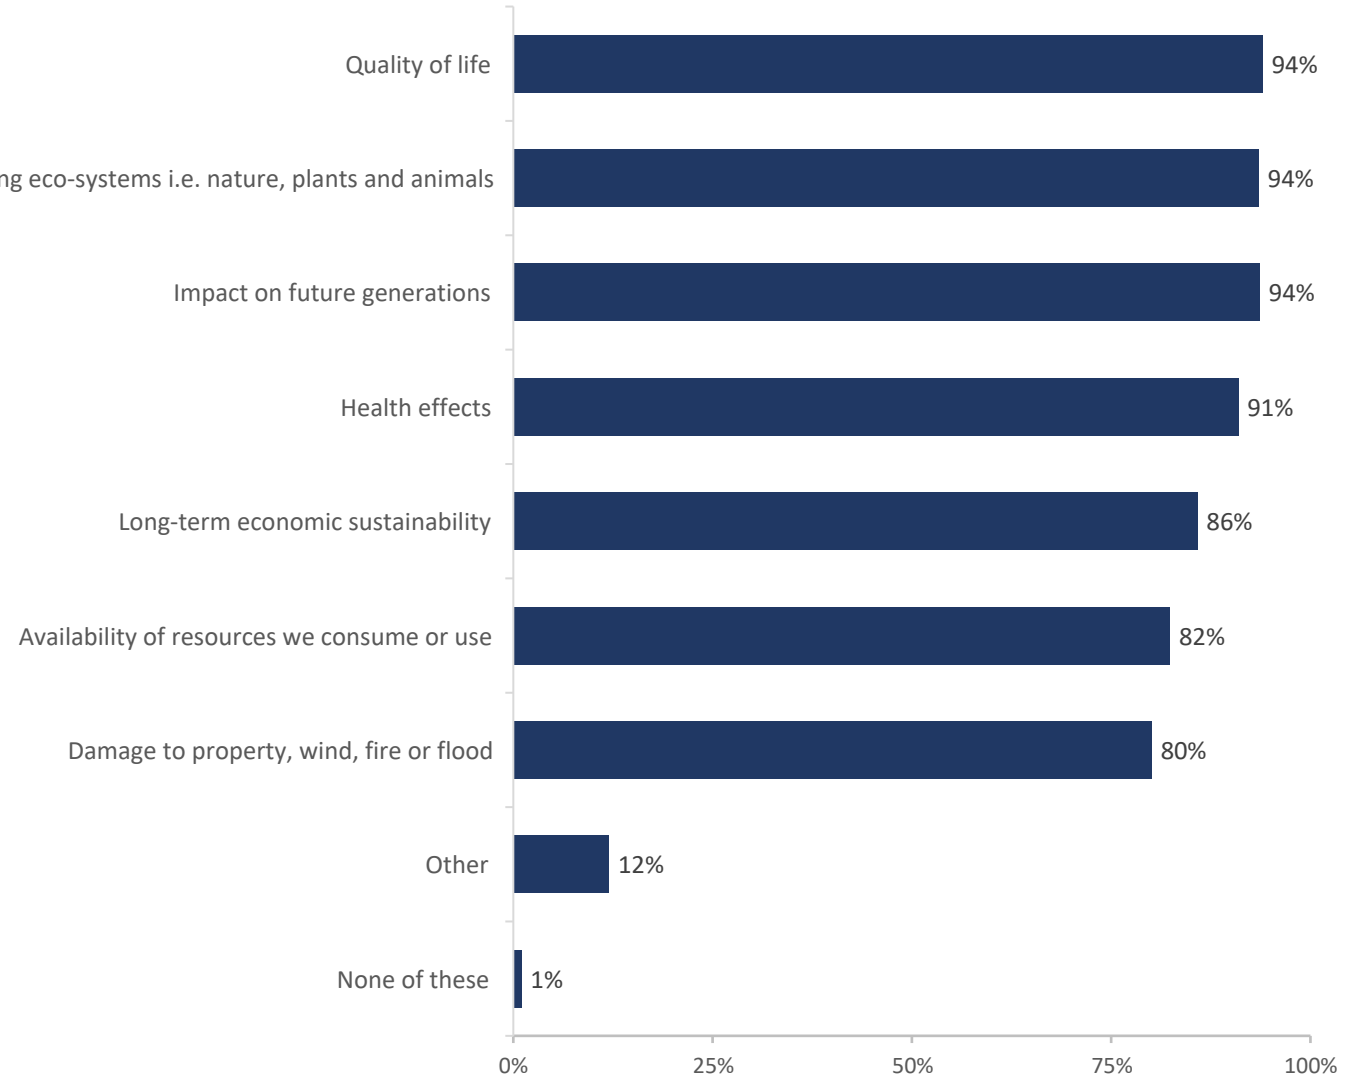

Females and home owners are significantly more concerned about climate change impacting the long-term economic sustainability (see next slide).

# Energy Consumption

Energy efficient light bulbs and appliances are the most common ways in which residents reduce their energy consumption. Home owners are significantly more likely to have installed energy efficient light bulbs, energy efficient insulation and to have installed solar panels.

1 in 5 currently use Green Power (renewable energy) in their home.

# Electric Vehicles

Although current usage and ownership of electric vehicles (EV) is low (11%), awareness and consideration is relatively high, with 63% of those who do not use/own and EV considering one.

Home owners are significantly more likely to own/use an EV, and of those that don't, those aged 35-64 are significantly more likely to consider one.

71% of residents are aware of the 3 fast car chargers available in Mosman and 77% believe Council should advocate for more EV charging stations.

Awareness of fast car chargers in Mosman

Base: N = 402

Should Council advocate for more EV charging stations?

Base: N = 400

Q14a. Do you own or use an electric vehicle?  
 Q14b. (If no on Q14a) Would you consider purchasing an electric vehicle?  
 Document Set ID: 6547490  
 Question ID: 6547490  
 Version: 1.0  
 Version Date: 28/11/2023  
 Question: Are there 3 publicly available fast car chargers in Mosman?  
 Question: Should Council advocate for more EV charging stations?

## Section 2:

# Awareness

This section determines awareness levels of Council’s Climate Action Plan and mitigation actions and explores preferred methods of receiving information from Council about sustainability and waste issues.

## Section Two

# Climate Action Plan

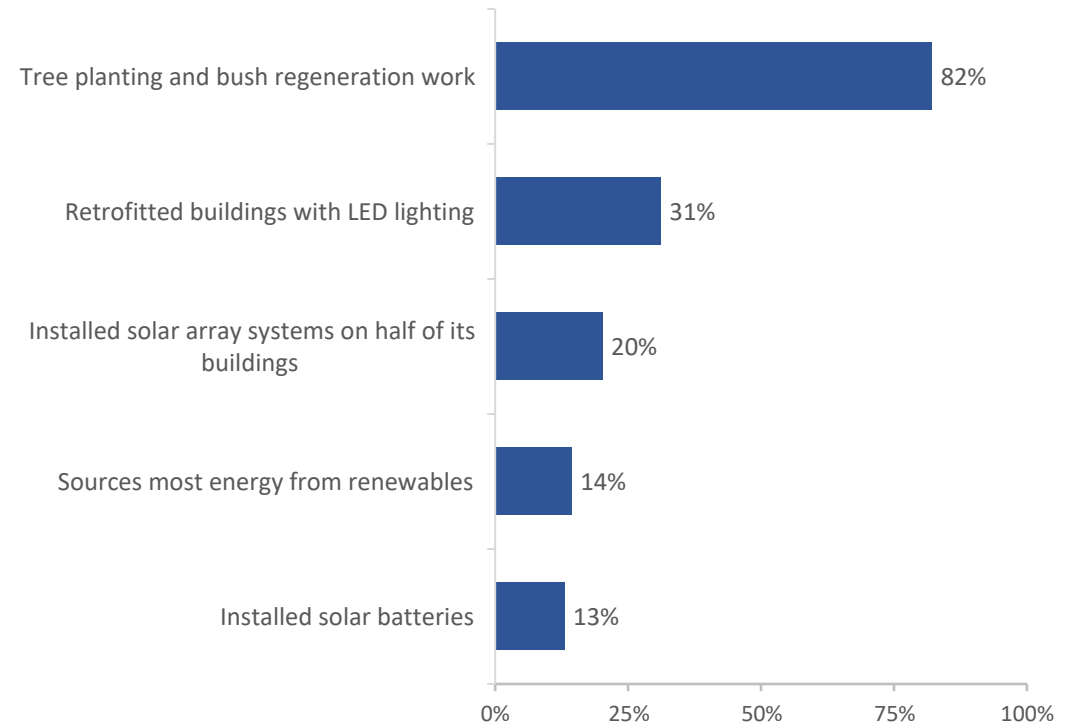

1 in 5 residents are aware of Council's Climate Action Plan and 82% are aware of Council's tree planting and bush regeneration work.

Males are generally less aware of mitigation actions and of the Plan overall.

**Awareness of Council's Climate Action Plan**

**Awareness of Mitigation Actions (Yes %)**

Please see Appendix 1 for results by demographics

Base: N = 402

Q11. Are you aware of the Council's Climate Action Plan - Mitigation Strategy and Climate Action Plan - Resilience and Adaptation Strategy, that are aimed at reaching net zero targets for Council and the Community and preparing and adapting

Document Set ID: 6547490 of climate change?

Q12. Are you aware of mitigation actions that are being/have been undertaken to assist achieve the Climate action plan. For each of the actions, please tell me if you are aware of them or not.

Version: 1, Version Date: 28/11/2023

# Information on Sustainability

Approximately 1 in 4 are aware of the Living Mosman Program (a series of workshops and events about sustainability) – In line with 2015 results (25% aware).

Council e-newsletter and the website are increasingly the preferred methods of receiving information from Council about sustainability and waste issues.

**Awareness of the Living in Mosman Program**

**Preferred Methods of Receiving Information from Council about Sustainability and Waste Issues**
